Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strains. The concentration of the *Agrobacterium* strain was 10⁶ cells/ml (A), 10⁷ cells/ml (B), 10⁸ cells/ml (C), and 10⁹ cells/ml (D). The transformation efficiency was determined by the number of transformants per 10⁶ cells of the *Agrobacterium* strain. The data were expressed as the mean \pm SD of three independent experiments.
